

IPE

ILLINOIS PROCESS EQUIPMENT

Established in 1996, Illinois Process Equipment (IPE) provides high quality pumps and services in the industrial marketplace. IPE is set apart from other suppliers of industrial pumps with our technical capabilities, responsiveness

to our customer needs, and exceptional process equipment support. We focus our attention on providing industry leading equipment along with value-added services that encompass the complete spectrum of a pump user's requirements.

Grundfos offers high quality solutions for a wide range of applications and markets using sustainable and energy-efficient products.

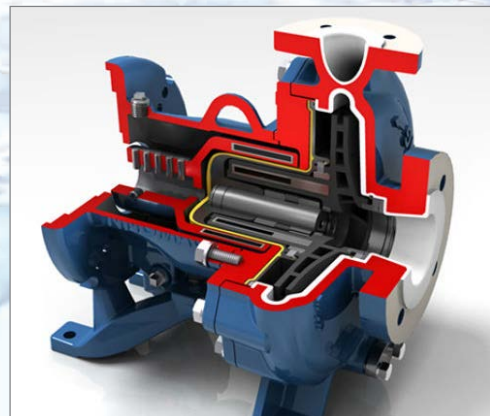

Peerless Pump is a leading manufacturer of industrial ANSI, Vertical, and Split case pumps providing high-quality products in different materials and configurations.

INNOMAG™ Sealless Pumps

Sealless Mag-Drive centrifugal pumps for critical chemical and industrial processes, ensuring leak-free performance and enhanced operational safety.

PIONEER PUMP

Horizontal end-suction and self-priming centrifugal pumps designed for clean and solids-laden liquids in industrial, food, wastewater, and mining applications.

PULSAFEEDER®

Brands: Eclipse, ECO, ISOChem

Mechanically sealed and Mag-Drive gear and centrifugal pumps covering a wide range of industrial applications.

Ampco Pumps Company

Ampco provides centrifugal and positive displacement pumps for the sanitary, pharmaceutical, food & beverage and industrial markets.

IWAKI AIR

Iwaki Air AODD pumps offer economical high performance fluid transfer with the ability to run dry, self-prime, and handle dead-head situations without damage.

MICROPUMP®

Fully Integrated Pump Services

IPE is Chicagoland's premier pump service and repair facility, offering custom maintenance and repair programs that reduce costly downtime. We deliver fully integrated services and turnkey industrial pump solutions including:

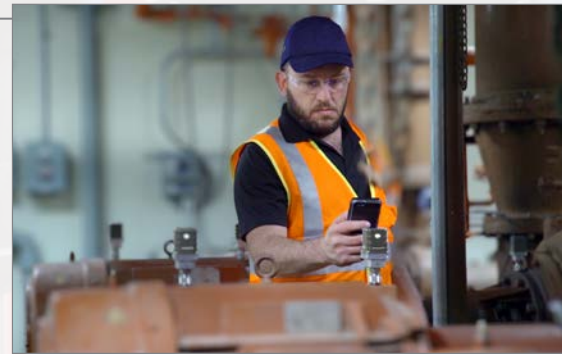

- Complete system design and engineering
- Pump equipment installation and testing
- Condition monitoring with real-time data
- Expert technical capabilities
- Field service
- In-house repair
- Energy audits
- Contract maintenance
- Stocking inventory

As a full-service repair center and Grundfos Authorized Service Partner, IPE is committed to working with customers on an individual basis. Our experienced staff of engineers and service technicians utilize state-of-the-art pump repair facilities to provide prompt attention and services that meet the customers' specifications. Customers enjoy the peace of mind that comes with knowing that a pump equipment specialist is on their team.

Condition Monitoring for Rotating Equipment

IPE, in collaboration with Grundfos Machine Health, offers condition monitoring services. By placing sensors on rotating equipment, they monitor factors like pump vibration and temperature in real-time. This proactive approach helps prevent equipment failures, avoiding expensive downtime, and allows customers to access live operating data and performance history through a dashboard, enabling timely actions to address potential issues.

Energy Audits

Our experienced engineers offer detailed energy audits evaluating energy usage of all pumps to recommend an energy savings solution. Energy audits help customers evaluate the benefits of upgrading equipment and justify capital improvements.
